- you can select predefined alerts or write your own
- photo frame - displays photos and plays videos from a USB flash drive or SD card
- horizontal or vertical display orientation
- wall mounting or freestanding

Description

Looking for a suitable clock for seniors? Airbi NOTE will not only help you keep track of time, but thanks to **notifications**, it will also **help with your daily routine and not forgetting important events**. It is a **versatile device** that can serve as a **digital clock with a calendar and notifications** or as a **photo frame**.

The most interesting feature of Airbi NOTE is the **text and sound alerts**. You can set **up to 42 alerts that will trigger at a set time and remind you of something you might otherwise forget**. You can **choose from** a **range of preset texts or write your own**. You can also set alerts to repeat on different days of the week (e.g. every Monday and Wednesday morning). At the set time, an audible **alert will sound and the specified text will be displayed**. Airbi NOTE is therefore particularly suited to elderly or ill people who can be helped with their daily routine.

Airbi NOTE excels in full support of several languages. Besides **English** and **German**, it's **Czech**, **Slovak**, **Polish**, and **Hungarian**.

The device's display always shows the time, date, or part of the day. It is possible to set a **voice announcement of the time at every full hour in the set language**. Thanks to all this, the device helps with the orientation in time. You don't have to worry about being disturbed by these notifications, as they can be switched off fully or for a specified time, for example at night. You can choose different views and screen layouts, the display can be oriented both horizontally or vertically.

Airbi NOTE also works as a **digital photo frame,** you can **view photos or play videos** from a **USB flash drive** or **SD card** (photos and videos are played only in horizontal

display orientation). The device also includes a headphones jack for better listening to sounds and videos.

The Airbi NOTE is operated by buttons on the back side of the device or by **remote control**. You can stand the clock on a surface such as a bedside table or hang it on the wall. The power supply is handled by a power cord and adapter, and a built-in backup battery that retains the settings even when it is unplugged (e.g. if you move it to another location).

Technical parameters

Supported video formats	RM, RMVB, MKV, MOV, M4V, MPG, FLV, PMP, AVI, VOB
